

How to Update your ThiEYE T5 Edge

Step 1

- **Please reformat microSD card.**

As reformatting erases of your content, be sure to offload your photos and videos first.

Step 2

Copy all files within the folder “Scenario” into your microSD card.

Open the folder “Scenario” and copy the two files “Key.txt” and “H020.BRN” into the **ROOT LEVEL** of the microSD card.

Step 3

Follow below instruction to start updating:

- ① Insert the microSD card into your camera.
- ② Connect the camera to the power socket until all steps finished. (Don't connect to PC or laptop)
- ③ Turn on the camera.
- ④ Stop doing anything when you see “FW ISP...” in the screen of camera and the blue indicator is on. Updating is proceeding.
- ⑤ Your update is finished only when the blue indicator is off.

Last Step

After upgrading the firmware successfully, please remove the microSD Card from your camera, then delete the firmware files in case of upgrading repeatedly.
